MANUFACTURING

Innovation China 2016

Min Zhou

INNOVATION CHINA 2016

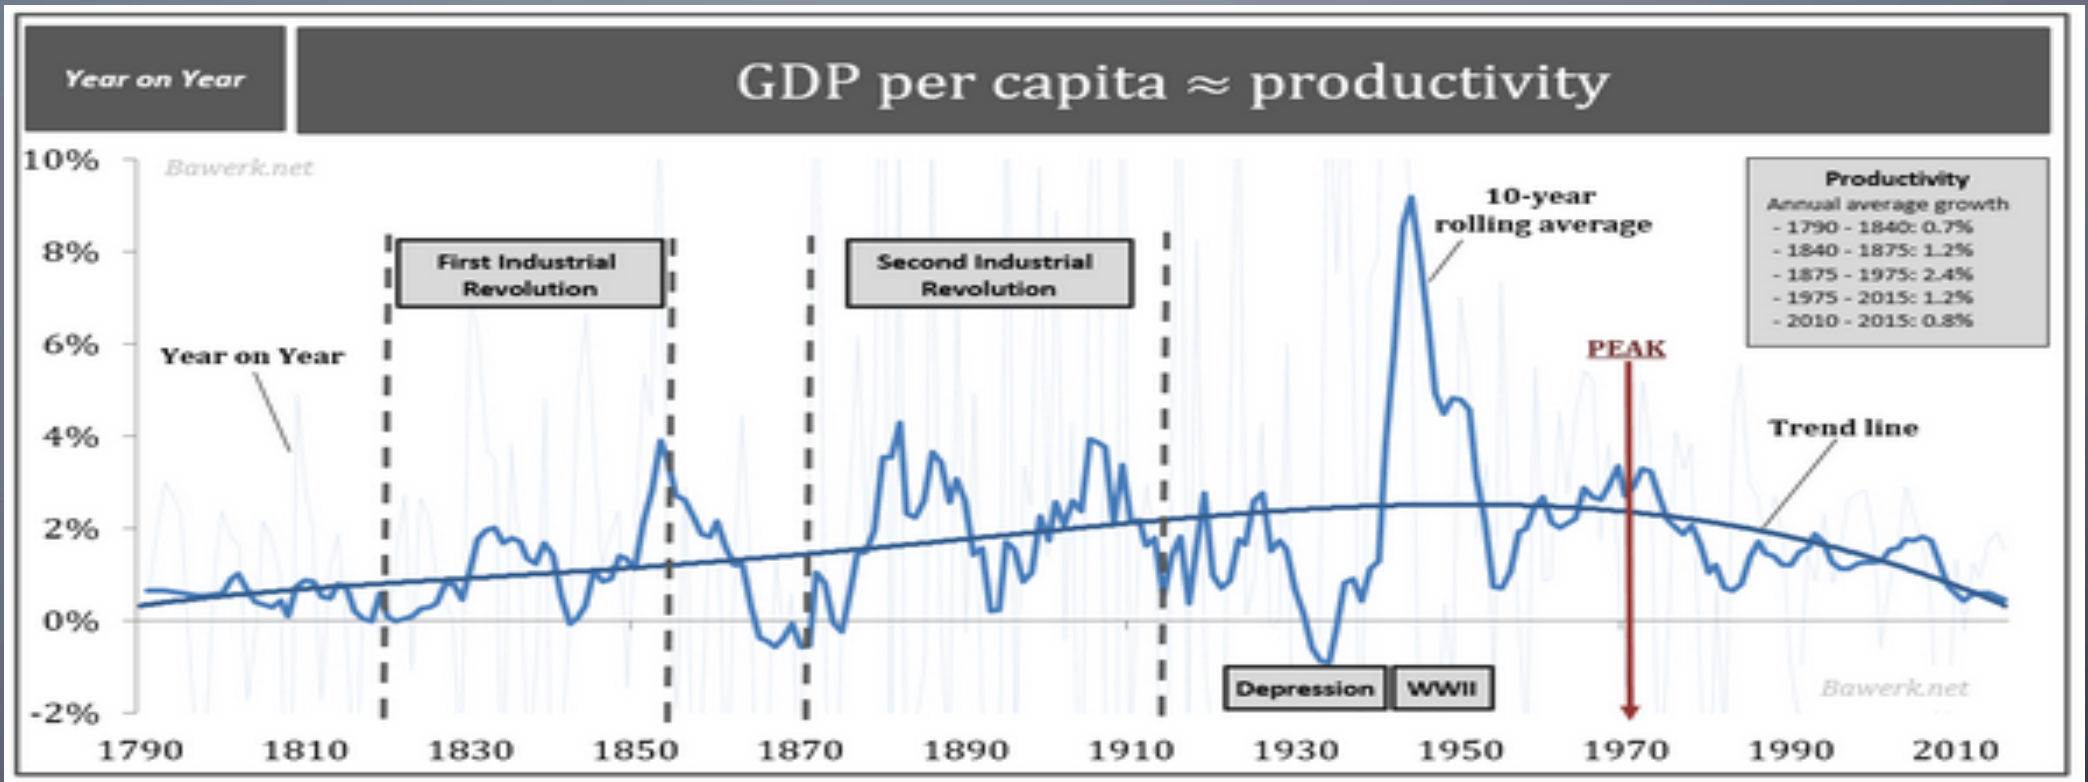

320 Attendees

- MNCs
- Start-ups
- Investmant Companies
- Public Institutions
- Professional Services
- Others

The background is a dark blue gradient. In the four corners, there are white line-art patterns resembling circuit boards or neural networks, with lines connecting to small circles.

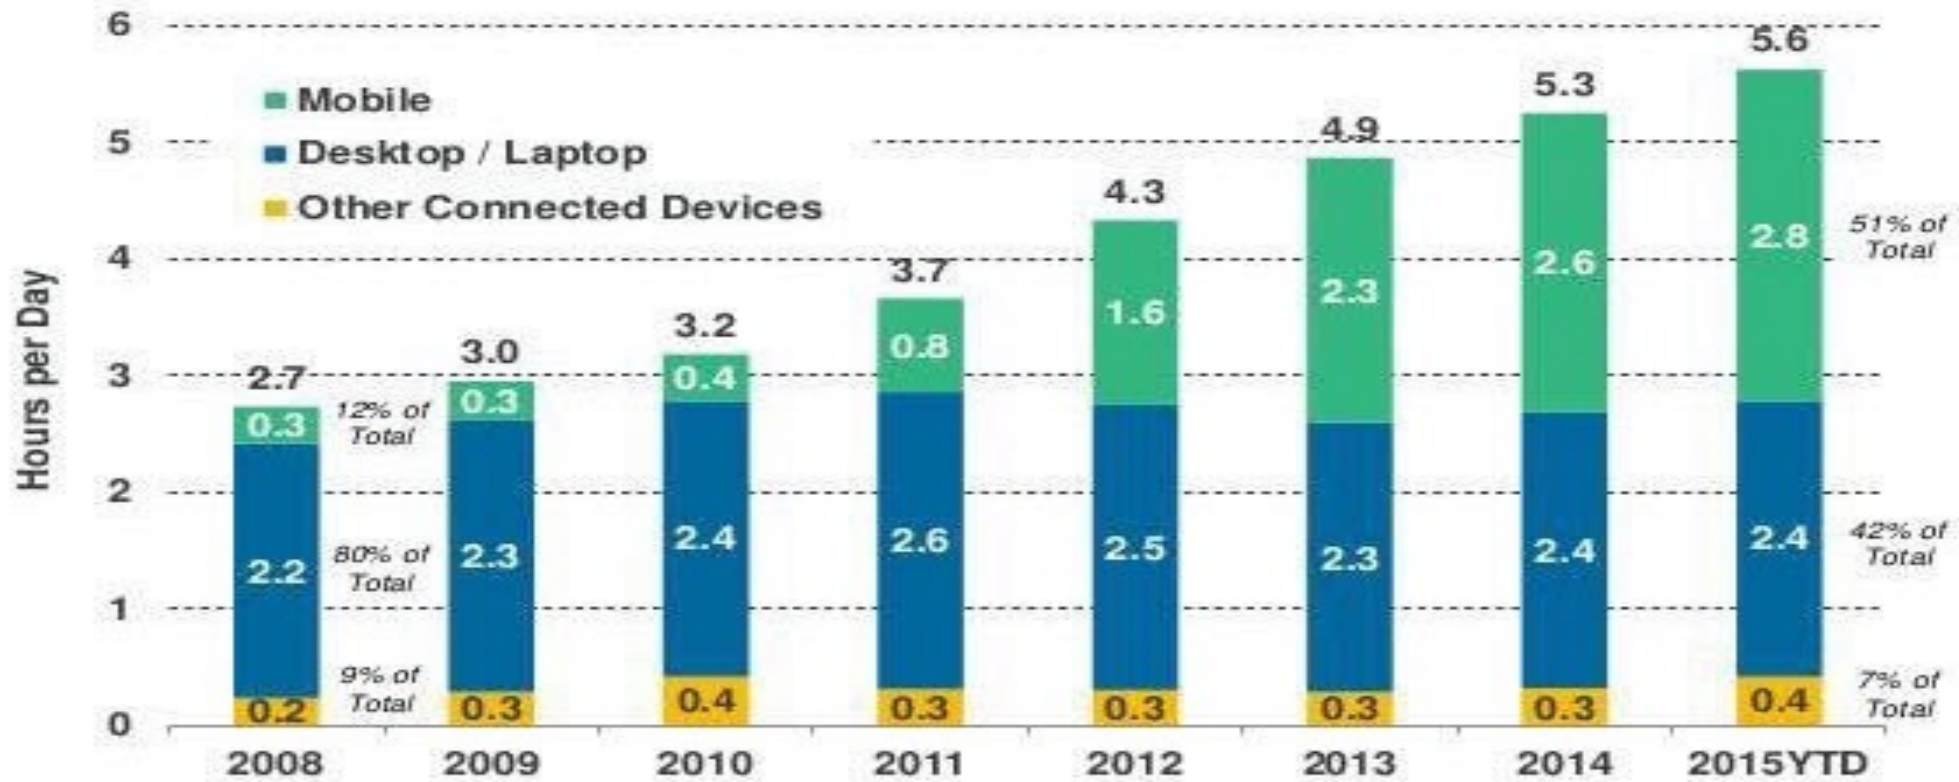

Why Manufacturing? Why Now?

The US became an unsustainable service-sector-based economy from the 1970s onward when service sector employment diverged from manufacturing Without a corresponding boost in productivity.

Internet Usage (Engagement) Growth Solid +11% Y/Y = Mobile @ 3 Hours / Day per User vs. <1 Five Years Ago, USA

Time Spent per Adult User per Day with Digital Media, USA, 2008 – 2015YTD

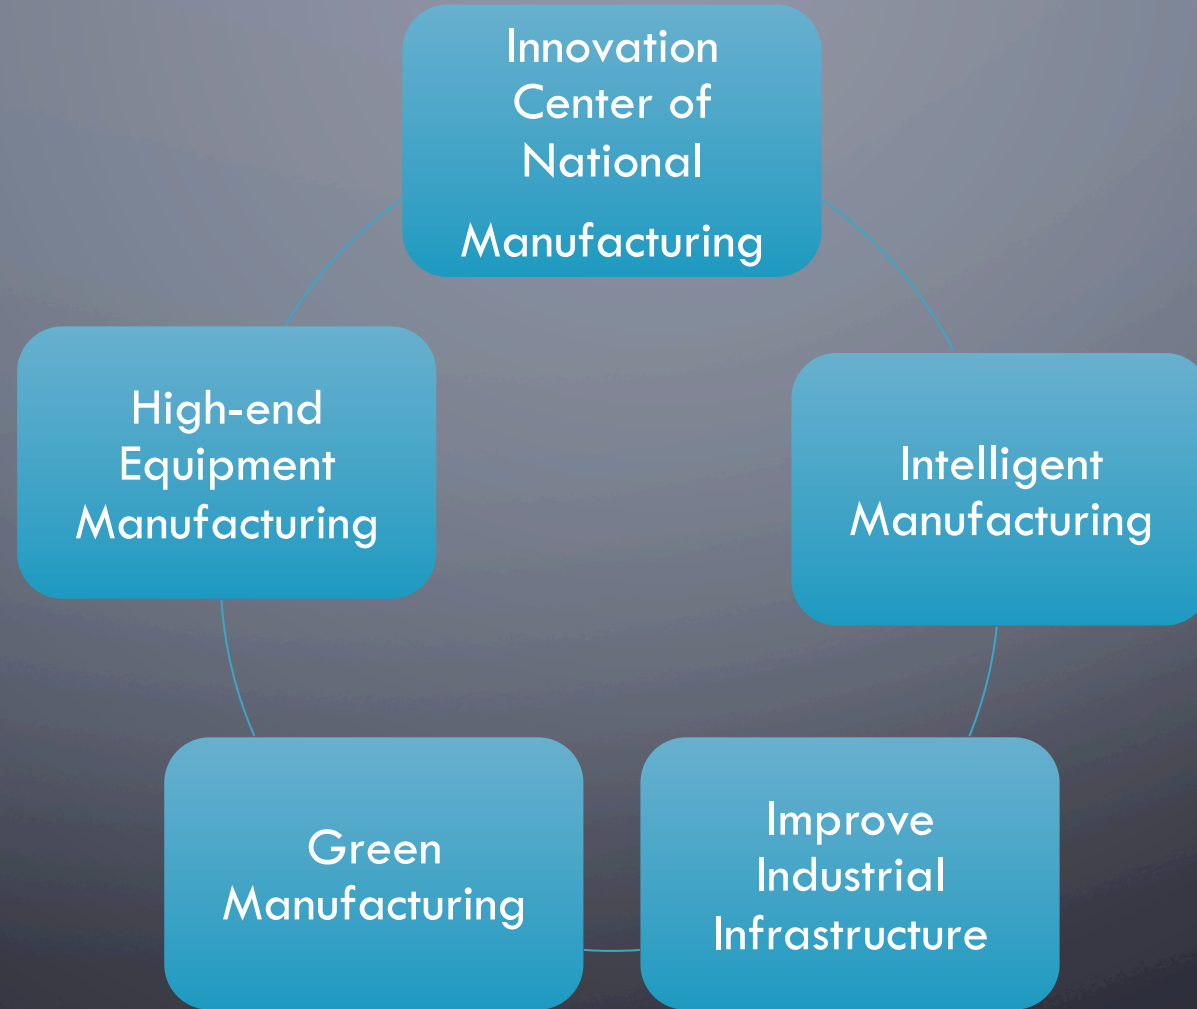

The image features a dark blue gradient background with white circuit board patterns in the corners. The patterns consist of lines and circles, resembling a PCB layout. The main text is centered and reads "China Manufacturing 2025".

China Manufacturing 2025

Five directives

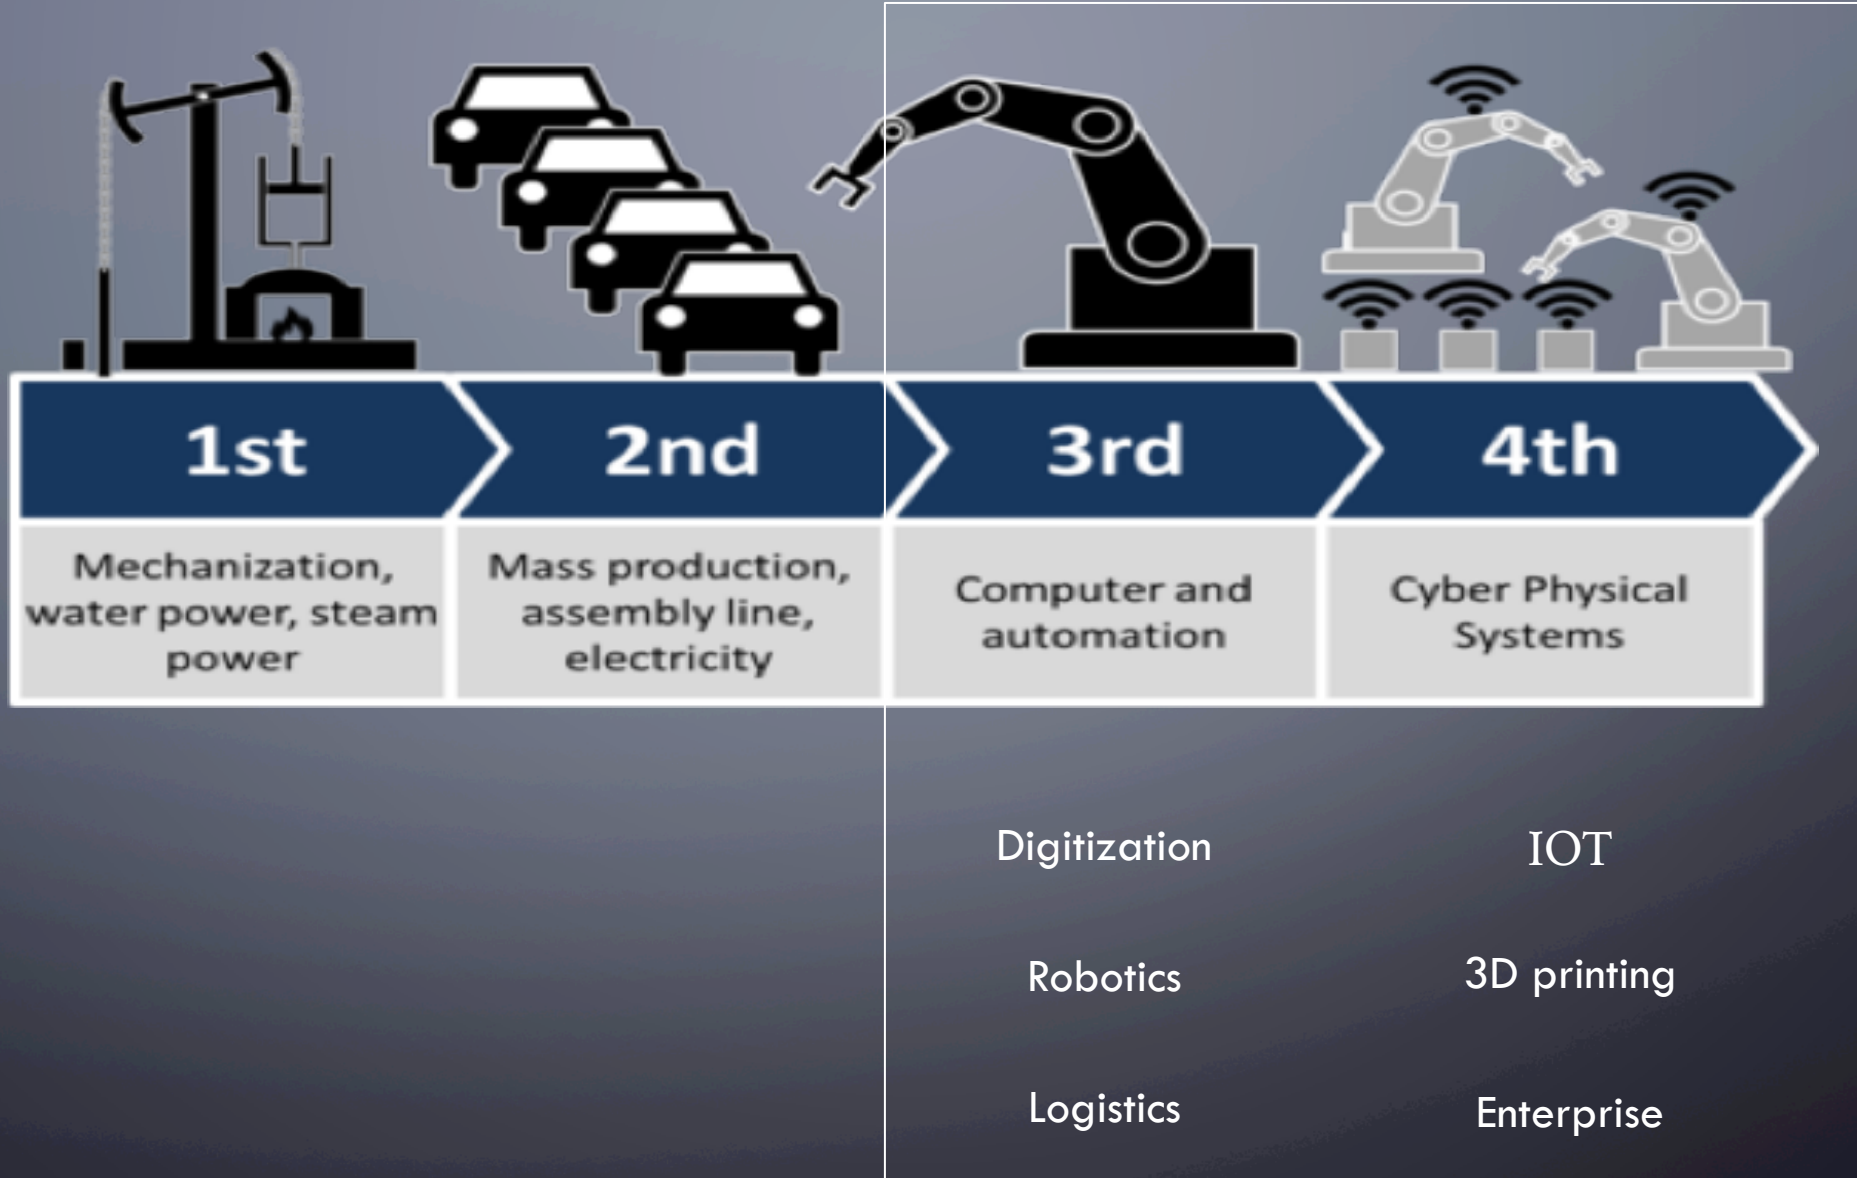

Technology pillars

- Big data throughout industry value chain
- Corporate IT system based on cloud
- More-market-oriented design
- Social platform for communication
- Customized production via 3D printing
- Robots for high-efficiency production
- IT promotes cross-industry collaboration and new business model

The background is a dark blue gradient. In the corners, there are white, stylized circuit board traces with small circles at the end of the lines, resembling a network or data flow diagram.

Opportunities for Venture Capital?

Opportunities for leapfrogging and new standard

Example: industrial gas industry

SAFETY REGULATION

- In China, gas cylinders are listed in special equipments which are under strict supervision by governments
- How to convert the additional cost incurred by government supervision to necessary investment for growing the company?

MARKET NEED

- The end users of gas cylinders are mostly small and medium enterprise. How to gather relevant data and make response to this dynamic market?
- how to build core competence in the sector by means of big data?

PRODUCTION MANAGEMENT

- How to resolve the contradiction between outdated production infrastructure and complicated customer, gases and cylinder models
- Operation team is facing severe challenge: rising labor cost and very high employee turnover

ASSET MANAGEMENT

- difficult to differentiate and manage customers' cylinders and its own cylinders when they are mixed in the cylinder fleet
- discrepancy between accounting book and real cylinder asset in the inventory because of lacking effective management
- low cylinder turnover and ROI while many idle cylinders sitting in warehouse and customer sites

Thingple 烁璞电子
Simply Connecting Everything

Strategic Partner of

Implemented at

An Industrial IOT Company

UHF – RFID SMART CYLINDER TOTAL SOLUTION by THINGPLE – tracking reinvented

- Smart RFID reader with embedded intelligence
- Eliminates middleware for quick installation and lower cost
- Hassle-free docking with enterprise software
- 100% read rate and on-reader event processing
- Data transparency and total asset visibility
- Data stored in a cloud-based database in real time
- High ROI from improved productivity
- Effort-less compliance with safety regulation
- Partnered with prominent cylinder-maker Tianhai Industry, to offer gas cylinders with tags incorporated at the factory

Opportunities for consolidation and growth

14,000

Industrial gas companies in China

140 million

Cylinders

Opportunities for new materials and technologies

Semiconductor

- Photoresist
- Silicon wafer
- SOI
- GaN
- SiC
- Superconductor
- CdZnTe
- Scintillation Crystal

Display

- CNT
- Touch Screen Material
- Liquid Crystal
- Optical Films
- OLED
- Sapphire
- Flexible Display

Environment Protection

- High Temperature Filter
- Catalyst for Denitrification
- Catalyst for Exhaust Gas
- Water Treatment Membrane

Energy Storage

- Li-ion Anode
- Li-ion Cathode
- Li-ion Separator
- Fuel cell materials

Electronics

Energy and Environment

Manufacturing

- Carbon Fiber and Composite
- Rare Earth
- Modified Plastics
- Ceramic
- Coating
- Crystals

Construction

- Low-E Glass
- Phase Change Material
- Fire-resistance wall
- Anti-corrosion Paint

New and Emerging

- 3D Printing
- Graphene
- Biomaterials
- Biomimetic materials
- Biodegradable materials
